# ARE YOUR PREMISES CLEAN? REALLY CLEAN?

Introducing our COVID-19 infection prevention services. We have a well-trained team who utilise the latest Fogging technology using state of the art equipment. Our Electrostatic Sanitiser allows for complete disinfection control and is used for sanitisation, anti-virus and epidemic prevention in all premises.

It is your responsibility to ensure your workspace or school is kept safe and clean, not only for your colleagues and students but also for all visitors, clients and contractors.

Our service works to ensure high-risk surfaces are thoroughly disinfected. This service is available to spaces of all shapes and sizes:

- Offices and shared workspaces
- Care homes
- Clinics and Surgeries
- Schools, colleges, nurseries
- Manufacturing facilities
- Vehicles and Transport Networks

## WHAT IS FOGGING?

Fogging is a technique that utilising the latest ICE fogging machines together with an approved Viricidal chemical (EN14476 sanitiser) which produces a fine mist that attacks airborne pathogens and once settled on the surfaces attacks the bacteria there.

This then remains effective on surfaces for 30 days.

WE CAN OFFER 2 SERVICES:

### 1. One-off Sanitising Clean

Perhaps your premises is about to reopen to staff, students or public, we will carry out a thorough clean of the premises utilising the same 30 day chemical as mentioned previously which neutralises any COVID-19 airborne pathogens and those lingering on surfaces.

### 2. Periodic Infection Prevention

We can tailor a programme of monthly or weekly infection prevention treatments with the same 30-day effectiveness.

## NEXT STEPS

Please get in contact for a no obligation quote on the contact details below.

We need the answer to a few simple questions such as:

- Type of premises (manufacturing /school/office etc)
- Square meterage
- Access details to ascertain suitable time to complete work.
